

## WGSA PERFORMANCE RANKING

"Counting Rounds: Best 80% of diffs | Min No.Rds: 40% of all rounds played"

- Championship Division players only
- "Counting Rounds" are taken from senior national and provincial championships on the WGSA ranking list (currently 50 rounds in 19 tournaments – 2014)
- Minimum number of counting rounds to qualify for inclusion is 40%
- Performance Rankings are based on a rolling calendar year (12 months)
- A dynamic rating is calculated for each round using a percentage of the field's net scores.
- A stroke differential is calculated for each player using their gross score for that round minus the dynamic rating. Note: this is not an adjusted gross.
- The player's current stroke differential which is used for the Performance Ranking is the average of the best 80% of her stroke differentials.

The Performance Ranking indicates how our top players perform under tournament conditions and is used by WGSA for selection purposes.

**March 2014**
